

Damage Information

According to the preliminary information from the Committee of Emergency Situations and Civil Defence (CoES) 10 citizens of the above mentioned village, who repaired the drinking water system at that moment, were covered by the landslide. At the moment 2 of them were found dead and the search and rescue of 8 remaining people is continuing.

After the landslide the sources of drinking water system have been affected. Currently, there is a lack of drinking water in the affected village. The landslide occurred out of the residential area thus the village and households were not affected.
